SUMMARY

- Frontend architecture and engineering specialist with hands-on experience building Monorepo-based systems and unified build toolchains.
- Strong background in system-level performance optimization and microservices architecture design.
- Experienced in engineering RAG and multi-model AI applications for real-world business scenarios.

SKILLS

Category	Technologies
Languages	JavaScriptTypeScriptPython
Frontend	ReactVue3Next.js
Engineering	MonorepoViteWebpackCI/CD
Backend	Node.jsNest.JSMicroservices
AI	RAGOpenAI APIMulti-model IntegrationVector Retrieval

PROFESSIONAL EXPERIENCE

Independent Developer | AI Full-Stack Engineer

Aug 2024 – Present
ASAIR – Multi-tenant AI Customer Support Platform

- Designed NestJS-based microservices and multi-storage architecture for multi-tenant deployment
 - Implemented RAG pipelines with multi-model orchestration and intelligent routing
 - Built message synchronization and session-lock mechanisms for distributed consistency
Results:
 - Achieved >99% message reliability
 - Improved AI dialogue efficiency by 50%
 - Enabled stable multi-tenant production deployment
- Pixuli – Cross-platform Intelligent Image Management System (Web / Desktop / Mobile)**
- Built cross-platform Monorepo architecture with 75%+ core code reuse
 - Refactored frontend rendering pipeline (virtual scrolling + Rust WASM optimization)

- Integrated AI-based tagging and image analysis workflows

Results:

- Improved image loading performance by 60%+
- Increased compression performance by 3–5x
- Enhanced overall responsiveness and system stability

Hundsun | Frontend Engineer (Engineering Infrastructure)

Aug 2021 – Aug 2024

- Led Webpack/Vite plugin architecture and unified CLI toolchain development
- Designed Monorepo-based multi-project architecture managing 10+ subprojects
- Optimized build pipelines and rendering performance

Results:

- Reduced build time from 8 minutes to 2 minutes
- Improved first contentful paint from 3.5s to 1.8s
- Reduced release errors by 80% and production bugs by 30%

EDUCATION

Hangzhou Normal University | Bachelor of Computer Science |2017 – 2024
